VISION

At the heart of every child lies creativity. Introducing an art exam starting in kindergarten is more than just an opportunity to evaluate; it's a chance to nurture imagination, build confidence, and foster essential skills that support early childhood development.

The purpose of an art exam at this age is to nurture creativity by giving children the freedom to explore colours, shapes, and materials while encouraging them to think outside the box. It provides a powerful outlet for emotional expression, allowing children to communicate their feelings and experiences in a non-verbal way. Engaging in drawing, colouring, and crafting enhances fine motor skills, laying the groundwork for academic development such as writing and problem-solving. Art also promotes cognitive growth by encouraging critical thinking and decision-making. Exposure to various art styles and cultural traditions builds appreciation and awareness of global perspectives. Most importantly, showcasing their artwork in an exam setting fosters a sense of accomplishment, boosting children's confidence and inspiring continued creative exploration.

Each child's work is evaluated with compassion and encouragement, focusing on growth, effort, and expression rather than technical mastery alone.

STD. 2

PLEASE READ THE INSTRUCTIONS CAREFULLY AND HELP YOUR STUDENT TO UNDERSTAND.

We will guide the student but creativity and colouring is the choice of the student.

We have provided sample drawings only as examples to guide the students. However, we do not expect students to copy these examples. Instead, we encourage them to explore their own ideas and create unique drawings.

Our exam for STD 2 is based on Design and Complimentary colours mainly.

Note:

1.Colour with oil pastels only(Any make)

2.Make an outline with a black sketch pen only.

Criteria for Assessment

1. Creativity

2. Colour combination

3. Shape and form

4. Details of the drawing

5. Finishing of line

6. Neatness

7. Overall impression

Sample papers explain the type of questions asked in the exam.

A brief introduction on Design is given below.

Design means planning how something will look and work. It's like using your imagination to make things beautiful, fun, and useful!

Design is a kind of art.
When we make things like posters, clothes, buildings, or toys, we use art to help us choose colours, shapes, lines, and patterns.

Art helps a design look exciting and interesting!

Who are Designers?
Designers are people who think of new ideas and draw or build them. They design many things around you like:

- Clothes
- Toys
- Furniture
- Books and posters

Designers use drawing, colouring, and creative thinking every day!

Colours are very important in design.
Some are bright and happy (like yellow or orange), and some are cool and calm (like blue or green).
Designers also use opposite colours (like red and green) to make things stand out. Complementary colours are opposite colours on the colour wheel. When placed next to each other, they look bright and bold because they stand out from one another. They make each other look brighter .Designers and artists use them to make pictures and designs pop out

Here are the main complementary colour pairs:

- Red and Green
- Blue and Orange
- Yellow and Purple

SAMPLE PAPER NO. 1
STD. 2

TOTAL MARKS : 50
